EXPERIENCE

Applied AI Technologist

July 2025 - Present

Freelance, Consulting

Longmont, CO

- Designed and delivered AI-powered software, automation systems, and web applications for small businesses and professional service providers.
- Built InTrust, a desktop application that automates estate planning document generation from structured client intake data.
- Developed and deployed client websites using React, Tailwind CSS, Vercel, and AI-assisted development workflows.
- Prototyped AI workflows involving large language models, image generation, video generation, and automation tools.
- Designed custom document-generation systems, interactive web experiences, and internal business tools tailored to client needs.
- Managed projects end-to-end, including discovery, technical architecture, development, deployment, and client support.

Creative Technologist

April 2022 - July 2025

Subsive

Austin, TX

- Evaluated and deployed emerging technologies including generative AI, augmented reality, and interactive web platforms to support client campaigns and experiential activations.
- Built rapid prototypes and proof-of-concept experiences that accelerated decision-making and reduced technical uncertainty during project development.
- Developed interactive experiences across AR and web platforms, balancing user experience, performance, and production constraints.
- Partnered with cross-functional teams and clients to transform creative concepts into technically feasible solutions.
- Continuously researched and validated new tools, workflows, and technologies to improve production efficiency and expand creative capabilities.

SELECTED PROJECTS

InTrust Estate Automation Platform | React, TypeScript, Tauri, DOCX Generation

- Built InTrust, a desktop application that automates estate planning document generation, transforming structured intake data into attorney-ready legal documents.
- Developed using React, TypeScript, Tauri, and automated DOCX generation workflows.

Healthcare & Counseling Websites | React, Tailwind CSS, Vercel

- Designed and deployed professional websites for independent healthcare providers with responsive design, SEO foundations, and client intake workflows.

Digital Museum Platform | JavaScript, Tailwind CSS, Responsive Web

- Developed an interactive web-based gallery experience featuring multimedia content, exhibit navigation, and responsive deployment.

TECHNICAL SKILLS

- **Languages & Frameworks:** React, TypeScript, JavaScript, HTML, CSS, Tailwind CSS, Tauri, AR Visual Scripting
- **AI & Creative Tools:** All LLMs, ComfyUI, Stable Diffusion, Midjourney, Veo 3, FLUX
- **Platforms & Operations:** GitHub, Vercel, Salesforce, HubSpot, Notion, Jira, [Monday.com](https://monday.com)

EDUCATION

Texas State University

Bachelor of Science in Public Relations, Minor in Business Administration

San Marcos, TX

Aug. 2013 - Dec 2018
